

```

import java.util.Scanner;

public class Main
{
    public static void main(String[] args)
    {
        int n, lar;

        Scanner s = new Scanner(System.in);

        System.out.print("Enter number of elements :");

        n = s.nextInt();

        int a[] = new int[n];

        System.out.println("Enter elements :");

        for(int i = 0; i < n; i++)
        {
            a[i] = s.nextInt();
        }

        lar = a[0];

        for(int i = 0; i < n; i++)
        {
            if(lar < a[i])
            {
                lar = a[i];
            }
        }

        System.out.println("largest element :"+lar);
    }
}

```

}
