```java
import java.util.Scanner;

public class Main
{
  public static void main(String args[])
  {
    int small, n, i;

    Scanner scan = new Scanner(System.in);

    System.out.print("Enter nmbr of elements : ");
    n= scan.nextInt();
    int[] arr=new int[n];

    System.out.print("Enter elements  : ");
    for(i=0; i<n; i++)
    {
      arr[i] = scan.nextInt();
    }

    small = arr[0];

    for(i=0; i<n; i++)
    {
      if(small > arr[i])
```

```java
            {
                small = arr[i];
            }

        }

        System.out.print("smallest element : " + small);
    }
}
```
